11/3/95

Dar Mr. Tindle,

From all I've heard Steve Tilley is a conscientious fellow who tries to be helpful but he is handicapped by being new to the JFK assassination archive. I think he made an honest mistake in missing FBI Exhibit 60 possibly because he does not know what that is.

I think you can eliminate that problem by referring to it as part of Commission Document 1. In which it is FBI Exhibit 60.

He had it confused with a Commission exhibit.

He has another problem: they have computerized it all with a completely new set of identifications.

This is the system they now use.

Sincerely,

Harold Weisberg
